

Create a web page with the following features (10 points max):

1. Add a style to the HTML document using an external CSS file. (1 point)
2. Create two paragraphs of text (e.g., Lorem Ipsum) and format them with different styles: (1 point)
  - font family,
  - color of the background and the text,
  - border style,
  - text alignment,
  - text effect.
3. Create one paragraph with multiple columns. (1 point)
4. Inside the paragraph style one word (or sentence) as italic and another one as bold. (1 point)
5. Create hypertext links a style their states (link, hover, ...), the link style without the underline by default. (1 point)
6. Create a gallery of at least 8 picture thumbnails (the same size) and place them in a row in an equal distance. If the width of the window is changed, rearrange the thumbnails. (2 point)
7. Format a table (create your own table, or use one from the previous assignment): (2 point)
  - header will have some background color,
  - odd and even rows will have different color,
  - if you place the mouse pointer on a row, the row will have changed background color (hover effect).
8. Create your own CSS animation. (1 point)
